

Riverbend Co-op

Carbon Footprint Report – Quarter 2021-02

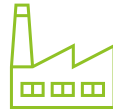

62.0% of materials used is being diverted away from landfills

Carbon Emission Intensity equates to 34.78 tCO₂eq per million \$ sales

3,878 m³ (853,040 gallons) of water was used and/or consumed

1,195 tCO₂eq was emitted by Riverbend Co-op operations

Riverbend Co-op diverted **20,341 kg** of waste from our landfills through the Loop Resource program from January to April 2021.

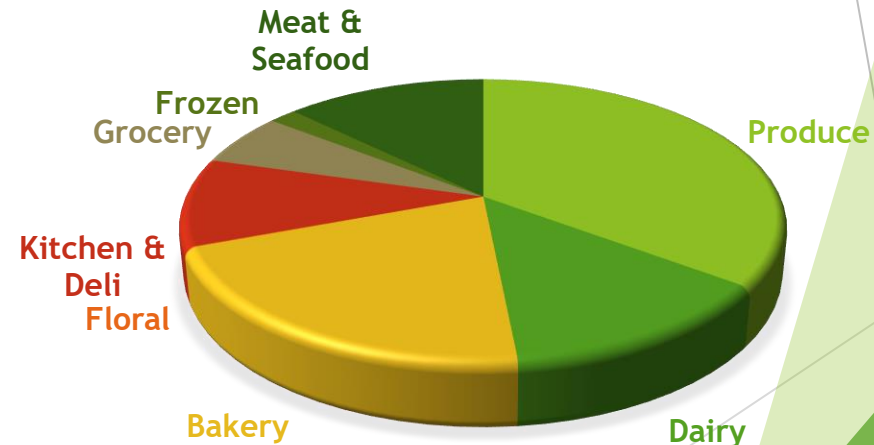

These results mean that Riverbend Co-op are projected to divert over **67,800 kg** of waste and save approximately **\$1,700** per year in tipping charges.

What is **LOOP** and why has Riverbend Co-op partnered with them?

Loop Resource enables Riverbend Co-op to divert one hundred percent of their unsaleable food away from landfills and towards those in their community who can use it best - farmers!

For farmers, **LOOP** means receiving food that can be used as feed for their animals, as bio-energy, or as compost.
